

# BEYOND THE BREACH

## How Effective Is Your Incident Response Plan?

In the face of sophisticated threat actors, a foolproof incident response plan is your best defense.

Follow these steps to make your response plan effective:

### Preparation

Identify critical assets, create a documented response policy and ensure all employees know their roles in safeguarding your digital fortress.

### Detection and identification

Continually monitor your entire infrastructure to detect and identify threats before they escalate.

### Containment, eradication and recovery

Isolate affected systems, eliminate the root cause of the incident and restore the impacted areas to their normal state.

### Post-incident analysis

Document the lessons learned and implement proactive measures to prevent incident recurrence in the future.

### Continual improvement

Revisit and update your plan regularly to keep it relevant and ensure its effectiveness.
